

2 LED colours Loading Bay Traffic Light GE020010 3 LED colours Loading Bay Traffic Light GE020011

Loading Bays Traffic Lights help in managing traffic flow for any loading dock station.

TECHNICAL DESCRIPTION

We can supply a complete range of Loading Bay Traffic Lights including ultra-bright LED based systems which offer exceptionally long operation life and very low power consumption.

All designs are compact to maximise visibility whilst also minimising the risk of accidental damage by trucks in the loading bay.

Easy to install fixings with full swivel action, allowing the light source to be set at exactly the right angle.

Both LED Loading Bay Traffic Lights comply with the international standards and directives.

CE
LED

OPERATION

Loading Bay Traffic Lights promote improved safety during loading and unloading and can be fully integrated with the loading bay door controls, allowing to change the light colour when the door opens.

- TRUCK APPROACHING or POSITIONED truck.
- Door OPEN / CLOSED.
- Dock leveller in REST POSITION.
- Chock PLACED.

The operation of the different signs depends of the combination with others products.
