Hydraulic Dock Leveller.

Self-hanging Type, with 500, 800 or 1,000 mm Retractable Lip.

Technical Description.

The RH32 dock leveller with retractable lip is specially designed for isothermal facilities. Its design allows a free space underneath the leveller to accommodate the tail lifts of certain lorries. Its hydraulic retractable lip, available in lengths of 500, 800 or 1,000 mm, allows the platform to adjust firmly and precisely to the transport vehicles.

Dock levellers with a Self-supporting Type frame **do not require a pit frame** to be fixed to the pit, as the structure is integrated into the leveller itself. Its main advantage lies in the fact that both the pit frame and the dock leveller are installed simultaneously, since they form a single unit.

This configuration allows for a longer dock leveller while occupying a shorter space on the loading bay.

Technical Characteristics

Platform

Tear plate 8/10mm thick Anti-slip tear top surface

Safety

Safety strut for maintenance

Finishes

Painted or galvanized

Dynamic Load Capacity

6 tonnes (10 tonnes)

Sizes

(Dock Leveller Measures) L 2570 x (W 1990/2190/2390) x H 605 mm L 3070 x (W 1990/2190/2390) x H 805 mm L 3570 x (W 1990/2190/2390) x H 805 mm

Options.

In addition to the standard technical speci cations of the dock levellers other options are:

- Lip lenght 500,800 or 1000mm.
- With pouring tray as an option.
- Load capacity (heavy duty): 10 tonnes.
- Painting in RAL 7016 or any RAL colour.
- Sizes: up to 4500mm length x 2400 width x 900 height*

For other options and measurements, please contact our sales team.

The Inkema RH32 Dock Leveller with retractable lip complies with European regulations: EN 1398

Safety Elements.

- Green LED safety indicator on the control panel
- · Hose rupture prevention system
- Emergency stop
- Toe guards: Fixed and movable
- Side Bands
- Safety Bar
- Anti-fall Safety Valves

Pit for RH32 (standard)

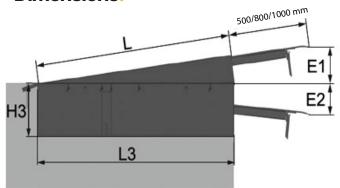

Pit for RH32 with formwork (optional)

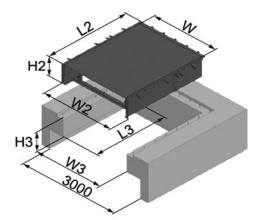

The RH32 are suitable for any industrial sector
