

TC03

Polyurethane stopper.

Prevent truck collisions with doors and structures.

Technical description.

400×80×70mm polyurethane loading dock stop with excellent hardness and resistance for constant load reception points.

The stops will always be supplied in pairs.

Technical specifications.

Some interesting data on the steel dock stop:

- Hardness (Shore A) 80 to 85 +/- 3
- Tensile Strength / MPa (psi) 42.0 (6092)
- 100% Modulus / MPa (psi) 9.3 (1349)
- 300% Modulus / MPa (psi) 17.8 (2582)
- Tear Strength, Die C (kN/m) 85
- Elongation (%) 420
- DIN Abrasion Resistance (mm²) 55
- Compression / 22 hr. -70°C. (%) 30
- Density Cured Material (gr/cm³) 1.10
